Assistant Commissioner for Patents  
Washington, D.C. 20231

Sir:

Prior to Examination, please amend the application as follows:

**IN THE CLAIMS:**

Please add the following new claims 32 to 37:

-- 32. A computer based method of operating a credit application and routing system, the system including a central processor coupled to a communications medium for communicating with remote application entry and display devices and remote funding source terminal devices, wherein the system processes credit applications entered through a web site, the method comprising:

receiving credit application data from a consumer through the web site;

selectively forwarding the credit application data to at least one remote funding source terminal device; and

selectively forwarding funding decision data from the at least one remote funding source terminal device to consumer through the web site.
